

# DEFIANT®

Experience makes the difference!  
[www.araiamericas.com](http://www.araiamericas.com)

[www.araiamericas.com/defiant](http://www.araiamericas.com/defiant)

**For those who demand style, but refuse to compromise for it!**

**Aggressive styling.**

**Street performance.**

**Rider satisfaction.**

Although much more aggressive on the outside, as compared to its siblings, the new **DEFIANT** contains all the internal attributes that set every Arai apart from the crowd.

Just some of the exclusive Arai features: FCS, multi-density / one-piece EPS liner, micro fitting interior padding, pull down spoiler, Dry-Cool® liner material. *\*More, in-depth details about the benefits of these features below.*

# Foundational feature of all Arai Helmets

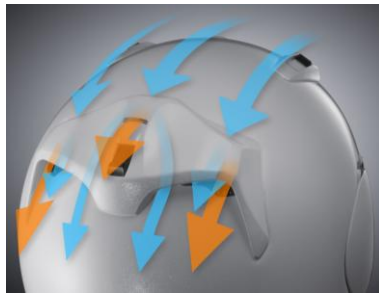

The foundation of every Arai helmet is a basic and simple organic shell shape.

A helmet is first & foremost an **Energy Management System!** From ventilation to aerodynamics, shield systems, radio, blue tooth and graphics - everything comes secondary, and none should ever interfere with the **helmet's number-one job of Impact Energy Management!**

Arai looks to the incredibly strong shape of an egg for inspiration. The **smooth uninterrupted spherical shape that transfers stress loads more evenly across its entire surface.**

The absence of exaggerated edges or protrusions in the shell is not a lack of creativity, but a commitment to maintaining the integrity of the shell with impact performance in mind.

## Additional features of the new DEFIANT®

Ventilation and aerodynamics are designed to work together to flow more air while reducing drag.

The new IC-4 upper front intake vents have a slide-gate closure that seals more completely when closed, allowing for a cleaner airflow while closed.

The new ACR-4 flow thru exhaust vent also allows airflow to pass over and through the vent, accelerating exhaust flow from helmet interior when open, and reducing drag when closed.

Brow vent ducting has been redirected to flow air across the temples, cooling the temporal arteries leading to the brain.

The air flow then passes the ear pockets, drawing away more excess heat, and exits out the side cowls.

A masterful example of taking what's in front of you and simply making it work better.

- SAI MAX-Vision "BROW VENT" shield, combines the enhanced field of view of the SAI eye port (with 5mm more peripheral view at each side), with a full eye port cavity to accept the Pin Lock 100% Max-Vision™ lens for larger anti-fog field of view.
- **Clear Pin Lock 100% Max-Vision® Brow Vent anti-fog lens "Included" with the helmet!** \*Image shown does not illustrate the brow vent cut outs.

# Additional features of the new **DEFIANT®**

- **Multi-Density (up to 5 in some models), Single piece EPS liner** provides exceptional impact energy management, while keeping the overall size and weight of the helmet to a minimum.

- **Fully removable/replaceable/washable Interior:** Comfort head liner, Cheek pads, Chinstrap covers & neck roll pad.
- **Water Repellent** material on exposed areas of cheek pads and neck roll prevents absorption of excess water in rain conditions.
- This new material also provides a luxurious feel for better comfort.

- The added benefit of **5mm peel-away temple pads** adds another level of customization, giving the helmet interior a little extra width when needed.
- Enhanced customer benefits of customizable, micro fitment interior, without the need to purchase extra interior components, underscores Arai's commitment to providing Arai customers with more.

- **New FCS® (Facial Contour Support) cheek pad design.**
- **Innovative and exclusive spring support** adds just the right amount of pressure when needed while being worn, but seamlessly “gets out of the way” when putting on and taking the helmet off.
- This design, combined with the **5mm peel-away micro fit layer**, amplifies Arai's attention to all aspect of fit.

- The design of the new **FCS®** cheek pad cannot be over emphasized. The contoured shape, combined with multiple layers of varying foam densities, supported by a patented spring, cradles the face like nothing that has ever come before – even in an Arai.
- The **FCS®** pads arc gently, simultaneously holding the cheek and jawbone firmly for a secure fit, while making gentle contact the soft areas of the cheek for incredible all day comfort without pressure.
- An added bonus of the new **FCS®** pads is the effect it has on lowering interior noise levels by blocking wind noise from entering the bottom of the helmet.

## Additional features of the new **DEFIANT**®

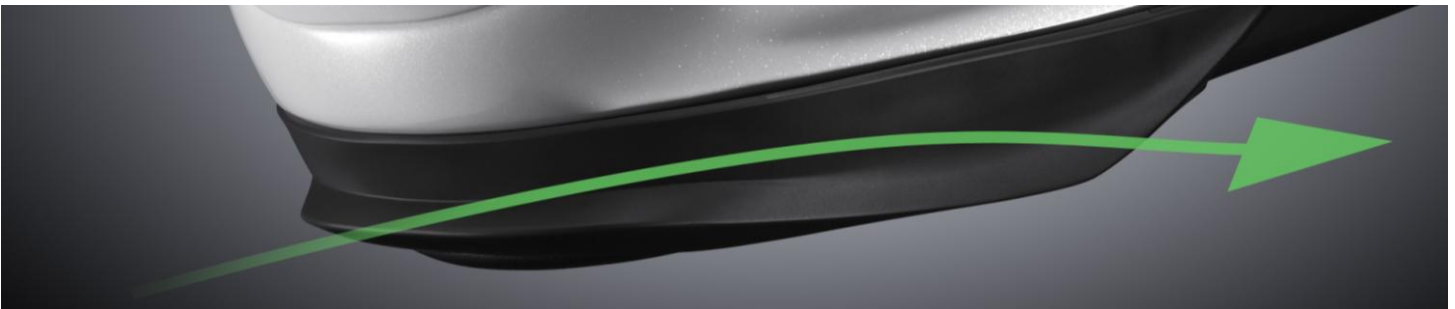

- New IR Neck Roll pad has an improved shape to flow more air to the bottom of the helmet at lower speeds for improved rider comfort.
- New shape also makes it easier to put on/take off the Defiant, with less contact and pressure on the ears.
- New water repellent material along bottom edge improves comfort for a dryer ride in wet conditions.

- Hyper-Ridge® reinforcing band, found on all Arai models, strengthens the shell around the large opening, helps maintain structural integrity under severe impact and carries more shell weight down low to improve and lower the center of gravity of the helmet for a lighter feel and less rider fatigue .

- Pull-Down spoiler improves airflow under the chin to enhance the exhaust flow when you exhale, while also streamlining.
- Used in conjunction with the new flared bottom edge trim, the Defiant proves to be extremely stable at speed and is a bit quieter too.

- New **IR front spoiler edge** trim creates a stabilizing down force, reducing buffeting, lifting and wind noise that can be generated by the turbulence trapped between your shoulders and the bottom of the helmet.

- New IR chin vent offers much more than simply an aggressive new look, it also provides multiple functions with tangible benefits for the rider.
- Position-1 allows air to flow through the top port and up the inner surface of the shield for de-fogging.
- Position-2 allows air to flow through the bottom four ports to the mouth.
- New design also allows for easy vent replacement.
